EXCERPTS

A vast literature now exists...on the ghastly terrors that pervade the business world and one can hardly turn on a television soap opera without being exposed to a lurid account of the venality, the corruption, the spiritual baseness of that world. Well, people whose souls are filled to overflowing with compassionate love...should not enter the world of business...or politics...should not become professors. If compassionate love were the sole motive of all human beings,... it would be an ideal world in which people would perish of boredom, if they had not previously starved to death.

* * *

The great hullabaloo now going on about business ethics is largely the work of people who believe that an economic system such as ours, in which economic activity is carried on by self-interested persons or organizations, is inherently immoral. Yes, of course there are moral problems and moral dilemmas... One should certainly feel guilty for doing the wrong thing in business. But it makes no sense to feel guilty for being a businessman.

* * *

Though capitalism is commonly counterposed to humanitarianism, the fact is that the two go together and are inseparable....it is a historical fact that all those movements of humanitarian reform that emerged around the time The Wealth of Nations was written were middle-class movements, financed by businessmen and led by businessmen

or their wives....A capitalist society does not respect the miser or ...the playboy. Most people who are very successful in our economic life...end up achieving social recognition by giving most of their money away.

* * *

It is the entrepreneur who provides the most dynamic impulse toward economic growth in our society -- a growth which permits everyone to better his condition. It is also the entrepreneur, not the corporate executive, who gets rich--really rich--the kind of riches that enable one to endow a chair...I only want to point out that money permits one to do things that one believes are worthwhile--and which would not otherwise get done.

* * *

Without the economic growth generated by self-interested economic activity in a free market, you could never have a welfare state. Many nations in the world today think they can create a welfare state without such economic activity and the growth it promotes. All they create are paper welfare states, in which everyone has the right to every wonderful thing, but where no one, in fact, gets very much of anything.

* * *

What is especially sad, in the United States today...is the adversary relation that has developed between the governmental sector and the business sector with each denouncing the other in the most childish terms. The word "bureaucrat" is in a much disfavor as the word "capitalist."

EXCERPTS

The survival of society as we know it is in jeopardy. Yet because the jeopardy is not imminent, our world leaders are too short-sighted to recognize or acknowledge it. They look at problems in terms of their own local geographic interests, and in terms of today, May 4, 1980. Somebody has to consider the big picture, the global considerations, the next century and the century beyond.

* * *

If population continues to accelerate at the present rate, in 700 years the world will have one person on every square foot of earth. Obviously, this cannot occur, and it will not occur. At some point, population growth will stop, and it will either be voluntary or involuntary. We have only two choices: we can do nothing, in which case a Malthusian solution will occur, and population will be limited by plague, extinction, war, disease, or stress and mass suicide; or we can plan, and control population in an orderly fashion. This implies rules, education, legislation, investment, enforcement, and restraints on individual liberties. There are those who will argue that this is a violation of our inherent freedom. But we have no other choice. The control of population will be voluntary, or it will be catastrophic. And it's time to begin to think about the problem.

* * *

We are a profligate nation, and it has been so easy to have everything that we are unwilling to consider thrift, or conservation, or self-denial. We use Pampers and nonreturnable bottles because they are convenient. We spend six times the energy in processing a TV dinner than we get back when we eat the food. And we use up precious hydrocarbon resources as our energy supply when the sun is inexhaustible and immediately available. We are in a desperate situation in the Middle East because we're so dependent upon oil. Our ally nations are afraid to support us because they are dependent upon oil. We could do more to strengthen our national security and our world prestige and resolve our international difficulties without losing a single life or firing a single shot by undertaking an immediate and intensive program to exploit solar energy! But, instead, we listen to propaganda which tells us that the sun won't be ready for exploitation until the next century, and we continue to burn up the valuable oil which will be gone anyway in a hundred years. At the present rate of use, we will be out of aluminum in 65 years; copper and gold in 30; silver in 40; and lead in 25.

AMITAI ETZIONI, senior adviser
Executive Office of the President
GW university professor-designate

Speaker at Commencement
GW Graduate School of Arts
and Sciences 5/4/80

EXCERPTS

or We should look at people not as what they are, but at what they are trying to become, and we should not apply to them the typical sociological lenses in which we characterize people as men or women, black or white, young or old, or according to the social class that they came from, but instead see them as having formed a vision of themselves as to what they're trying to become, and project that vision into their future.

* * *

Maybe in the '70s, there was a kind of reaction to some of the excesses of the '60s. But the "me generation" and the preoccupation with self have pulled us too far in the other direction. As we move into the '80s, there are three reasons why we should try to reserve some of the energy, some of the vision, some of the dedication, for the public side of life.

One reason is sociological. Society needs that energy. If citizens become completely absorbed in their private projects, then the public arena is left completely to special interests. The only way special interests can be balanced and society can be set on the correct course, is for every citizen to put some of his time, even if it's a small amount, in the public arena.

The second reason is psychological. Ultimately the preoccupation

with self, the desperate attempt to have fun and games today because tomorrow will never come, is self-defeating. The ultimate satisfaction lies in relating to, participating in and identifying with something bigger than self.

The third reason is societal. The society which you help prepare will be the society you will all be living in.

THOMAS K. MINTER
assistant secretary-designate for
elementary and secondary education
Department of Education

Speaker at Commencement
GW School of Education and
Human Development 5/4/80

EXCERPTS

The reasons for the failure of repeated attempts to pass a cabinet-level Department of Education bill prior to last year's enactment of the Department of Education Organization Act are similar to those that delayed, until 1965, the passage of any bill that would provide massive federal aid to education:

- Fear that federal money would lead to federal control of schools; that we would create a federal "Ministry of Education" similar to those of many European countries
- Concern by some, that federal money would support schools practicing racial segregation; and the opposite fear, by others, that the promise of equal educational opportunity would bring an end to separate schools for the the races
- The question of federal aid for private education, especially for Catholic and other parochial schools

* * *

I suspect there will always be skeptics, but I assure you that as the "junior partner" in education (we supply less than 10 percent of the funding for education in the United States) the Secretary, her officers and staff of the new Department of Education have no intention of developing any institution other than one that operates in a supporting, supplementary and helping role toward state and local agencies.

* * *

Although the necessary recisions in the 1980 budget and the amendments to the 1981 budget that have been recommended to Congress

will delay or postpone the realization of the full measure of maintaining support... there is, nonetheless, an overall \$1 billion increase in the Department of Education budget and we will press on with our programs. The proposed cutbacks are painful. I realize that when combined with cutbacks in other related government programs, state and local school districts will suffer. However, no recommended cut was made thoughtlessly or callously by our department.

* * *

In addition to the increased efficiency and effectiveness that is promised in the administration of the department's programs and services, two special advisory bodies offer great promise for change.

--The Intergovernmental Advisory Council on Education will provide a "...forum for representatives of federal, state and local governments and public and private educational entities to discuss educational issues...(and to) make recommendations for the improvement of the administration and operation of federal education and education-related programs."

--The Federal Interagency Committee on Education is designed to do what so many of you have asked for years: to provide "...a mechanism to assure that the procedures and actions of the department and other federal departments and agencies are fully coordinated." Another tall order! I am not sanguine, but these two organizations must work if the promise of the department is to be fulfilled.

-end-

VALERIE T. McCOMIE
assistant secretary general-elect
Organization of American States

Speaker at Commencement
GW School of Public and
International Affairs 5/4/80
EXCERPTS

In general, the influx of new countries on the international scene has been greeted with mixed feelings by the power brokers in world politics. They are either treated paternalistically or pressured into lining up with one or other of the super powers. However, the most difficult challenge they encounter relates to the legacy of colonialism. There is an unspoken assumption that the colonial experience was the model of democracy and therefore on assuming responsibility for their own affairs colonial peoples inherit a system of democracy which should be operated unchanged.

When the leaders of newly independent countries undertake the major political, social and economic changes to transform their countries into truly participatory democracies, they inevitably encounter bitter resistance from the defenders of the status quo who appeal for help from the erstwhile colonial power. Some form of external intervention then ensues in the name of preserving stability.

* * *

There is no doubt that many of the poor nations of the world have suffered economic agony as a result of the dramatic increase of oil prices over the last five years. But in general they have suffered in silence and given moral support to OPEC because they see it as representing a strategic breakthrough towards the ultimate goal of a new international economic order. This is a challenge that the

industrialized countries will ignore at their peril. Indeed, what is required is a new international order based on respect and concern for the welfare of all mankind.

* * *

Much of the thinking about development over the last 30 years has focused mainly on economic growth as the solution to poverty and underdevelopment. It was argued that increased capital flows and higher efficiency in the use of this capital together with the introduction of sophisticated technology would lift these economies up by their bootstraps and provide higher living standards. Little attention was paid to the social dislocations that might result from this process.

* * *

It is true that powerful nations have always sought to bend international organizations to their will. But they cannot be blamed if they are permitted to get away with it through the acquiescence of the other members. What seems incomprehensible when they are not allowed to have their way, is the avalanche of criticism bordering on abuse that is leveled at the organization with the object of undermining public confidence in it. It is of little avail to point out that international organizations have no identity or existence separate from their members. Indeed, they are nothing but a faithful reflection of the strengths and weaknesses of the members.

LOCAL RESIDENT WINS PRIZE AT GW ENGINEERING FAIR

WASHINGTON, D.C. -- Charles E. Andraka, a senior at Eleanor Roosevelt High School, was awarded the \$300 first prize at the Fourth Annual George Washington University School of Engineering and Applied Science Engineering Fair held recently at the university.

Andraka's project, one of 30 entries, was entitled "Variable Displacement: A New Twist," and showed the conversion of an existing Chrysler six-cylinder engine to a variable displacement system expected to show a savings of 10 to 30 percent in gas economy. "An automobile needs four times the power to accelerate as it does to cruise," said Andraka, "so the ideal car would have two engines -- a large one to accelerate and a small one to cruise. If one engine is used in which the displacement can be changed, you essentially have two engines in the space of one."

The second-place award of \$200 went to Jeffrey R. Ambroziak, an eighth grader at Washington Irving Intermediate School, for his entry entitled "Pensegrigy." Third-place winner was Joseph W. Hutchinson, a senior at West Springfield High School, whose entry was "Construction of an 8080A Microcomputer."

RE: WORKSHOP ON THE RELIGION OF SOUTH INDIA AT GW

George Washington University will host the 11th annual workshop of the Conference on Religion in South India from Friday, May 16 through Sunday, May 18 in the fifth floor lounge of the GW Marvin Center, 21st and H Streets, NW. This year's theme is "Purity and Auspiciousness in Indian Religions."

Among the many scholars of religion assembling for the conference is the event's principle organizer, Frédérique Apffel Marglin, professor of anthropology at Harvard University. J.F. Staal, professor of linguistics at the University of California at Berkeley, will show his film Agnicayana.

The conference times are Friday from 7:30 to 9:30 p.m.; Saturday from 9 a.m. to noon, from 2 to 4 p.m. and from 8 to 9:30 p.m.; and Sunday from 9 to noon. For information call Dr. Alfred J. Hiltebeitel, GW associate professor of religion, at 676-6326.

RE: CEREMONIES FOR THE DEDICATION OF THE BRONZE
OF GEORGE WASHINGTON AT GEORGE WASHINGTON UNIVERSITY

At 10 a.m. Friday, May 16* a bronze bust of George Washington, the only outdoor statue of Washington on the GW campus, will be dedicated and unveiled. The bronze is located at the University Mall at Eye Street NW between 23rd and 24th streets, *N.W.*

After the ceremony a string quartet will perform and refreshments will be served under a yellow-and-white pavilion on the mall.

Attached is a fact sheet and campus map showing the location of the ceremony. Fran Marsh, Jane Lingo and Diane Rush of the GW Public Relations Office will be present.

*IN CASE OF RAIN, the ceremony will move into the lobby of Ross Hall, which directly adjoins the mall.

RE: CEREMONIES FOR THE OPENING OF THE UNIVERSITY MALL AT EYE STREET
GEORGE WASHINGTON UNIVERSITY

Two ceremonies have been scheduled on Friday, May 16.*

The first, at 10 a.m., is the unveiling of a bust of George Washington located on the mall. The sculptor, the donors and special guests will attend.

The second ceremony, at noon, is the general dedication of the mall itself, with the university community, Foggy Bottom/West End residents, District of Columbia city councilmen and Metro officials attending.

A string quartet will perform and refreshments will be served after both ceremonies under a yellow-and-white pavilion on the mall.

Attached are fact sheets on both events and a campus map showing the location.

Fran Marsh, Jane Lingo and Diane Rush of the GW Public Relations Office will be present during both events.

MEMO TO: SCIENCE AND MEDICAL EDITORS

FROM: DIANE H. RUSH, NEWS MANAGER
676-6464 office
338-3497 home

The tendency of surgical implants to break under stress or to corrode has become an increasing problem because of implantations in young, active patients. Today an implant must be durable for 30 to 40 years, and nearly 150,000 implants are done each year.

The life of a surgical implant can be increased many times through proper heat treatment, according to new research conducted at George Washington University by professors Ashraf Imam and Charles Gilmore of the School of Engineering and Applied Science and Dr. Anna Fraker, metalurgist with the National Bureau of Standards.

According to Medical Devices Report, "They have found that the titanium alloy, Ti-6Al-4V, when treated in a 900°centigrade solution and then water-quenched, has its corrosion fatigue life increased twofold in a Hanks physiological (saline) solution (artificial body fluid solution) and tenfold in air. The heat treatment and other processing also increases the fatigue life of a cobalt chromium alloy (CoCr) often used today in permanent implants."

The research team has presented findings to the American Society for Testing and Materials, and Dr. Imam will present a paper at the Fourth International Conference on Titanium and Titanium Alloys in Kyoto, Japan (May 19-22).

MEMO TO EDITORS

The following comments by Dr. Eugene Kelly, dean of George Washington University's School of Education and Human Development and the only dean of a school of education to serve on task forces making recommendations to the Secretary of Education and her advisors on the organization of the new Department of Education, may be useful for an opinion-editorial piece.

Diane H. Rush

(202) 676-6464 (office)

(202) 338-3497 (home)

May 12, 1980

Teachers, who may feel powerless at the bottom of the education hierarchy, are profoundly affected by the establishment of policies at the local, state and federal levels. For example, the policy in the area of teaching the handicapped is having a pervasive effect on states, localities and, very directly, the classroom teacher, who is expected to effectively handle a very wide range of abilities among children. There are many good and powerful reasons for that policy and I'm in support of it, but I think it's an example of how policy affects what's going on in the classroom.

I was particularly interested in the evolving role of the federal government in the professional development of teachers. One recommendation that came out of our task force was that serious consideration be given to the establishment of an office or bureau of education professional development which would bring together those major programs at the federal level whose primary focus is education of teaching professionals, such as teacher corps, teacher centers and administrator management training. That office would also coordinate other programs scattered throughout the department that relate to professional development. For example, in the new Office of Special Education and Rehabilitative Services, a rather substantial amount of money goes to training and retraining teachers for bilingual education. So within an Office for Education Professional Development, there would be a coordinating mechanism.

A personal opinion is that in the new Department of Education there should be a unit which has responsibility for focusing on issues especially related to schools and colleges of education. I'm

very much aware of and sensitive to criticisms, many of which are quite legitimate, of elementary and secondary schools as well as schools and colleges of education and the need to make improvement. But having said that, an immense amount of work in teacher education and research has been conducted in schools and colleges of education, and this is a vast resource of personnel and information which needs a direct tie-in at the federal level so that there can be mutually beneficial influences.

A different but related point is the need for greater lines of collaboration and articulation among all levels of education--schools, colleges and universities. I think the new organization of the Department of Education can bring this about, but I'm reluctant to say it will. There are still all kinds of forces that lead to fragmentation, such as categorical legislation promoted by special-interest groups.

The new department will give greater visibility within the federal government, greater access to resources and greater attention to educational problems as they occur and not just as a subhead under other problems. The Secretary will sit as a cabinet member with the President, so the Department of Education will be directly represented at the highest level of government. That at least sets the stage for more powerful and timely intervention than when education was submerged in the bureaucracy. In the new department there will be an Office of Educational Research and Improvement which will bring greater support and impetus to the whole area of improvement in education. In this office there will be greater emphasis on dissemination of new knowledge, so that a model project can be more quickly replicated in other locales.

ACTION DIRECTOR TO SPEAK AT GW LAW GRADUATION

WASHINGTON, D.C. -- The Honorable Sam Brown, director of ACTION, the federal volunteer service agency, will deliver the address at commencement exercises of the George Washington University National Law Center on Sunday, May 18 at 1:30 p.m. in the Charles E. Smith Center, corner of 22nd and G Streets, NW. A reception in the University Yard behind the National Law Center, 720 20th St., NW will follow the ceremony.

GW President Lloyd H. Elliott will confer degrees in course as well as honorary degrees. The honorary Doctor of Laws will be conferred on Edward F. Howrey (J.D., 1927), former chairman of the Federal Trade Commission and founding member of the Washington law firm of Howrey and Simon.

Approximately 400 new lawyers will receive degrees on Sunday in the Smith Center. In case of rain the reception will be held in the third floor ballroom of the Marvin Center, 21st and H Streets, NW.

\$1.5 MILLION GELMAN GIFT NAMES GEORGE WASHINGTON UNIVERSITY LIBRARY

WASHINGTON, D.C. -- The Gelman Foundation, Inc. has given George Washington University a \$1.5 million naming gift for the university library. The building was named the Melvin Gelman Library in ceremonies May 14.

"We at George Washington are especially grateful that the Gelman family has chosen an endowment for our library -- the heart of the university -- to symbolize the family's ties over the years with this institution," said GW President Lloyd H. Elliott in announcing the gift.

Melvin Gelman received the bachelor of arts degree in government and business administration from George Washington University in 1940. That same year he joined the Gelman Construction Company founded by his father Elias in 1925. Under Melvin Gelman's leadership, the company built many homes in the Washington area, built and managed apartments, and developed and constructed shopping centers and an office building.

Following Mr. Gelman's death in 1978, his widow Estelle, for many years secretary of various Gelman corporations, was elected president by the board of directors. She also serves as president of the Gelman Foundation, Inc.

Three other family members have received bachelor of business administration degrees from George Washington University: a daughter, Elise Gelman Lefkowitz, graduated in 1978; son-in-law Marc D. Lefkowitz graduated in 1977; and another son-in-law, William A. Miller, graduated in 1972. Mr. Miller is the husband of Elaine Gelman Miller and is vice president of several Gelman corporations.

The Melvin Gelman Library, built in 1973 at 22nd and H streets northwest, is the principal library of George Washington University. It houses some 580,000 volumes and contains archival collections and an audiovisual center.

GW LAW DEAN TO SPEAK DURING CONNECTICUT STATE BAR ANNUAL MEETING

WASHINGTON, D.C. -- Jerome A. Barron, nationally recognized First Amendment scholar and dean of George Washington University's National Law Center, will speak to Connecticut-area GW law alumni on Wednesday, May 21, during the annual meeting of the Connecticut State Bar Association. A 12 o'clock reception precedes lunch at the Sheraton-Park Hotel, New Haven.

Barron, a GW law faculty member since 1965, became dean of the National Law Center last year. He will discuss "GWU National Law Center: A Look to the Future."

RE: TV and the 1980 Presidential Campaign

As the pace of the 1980 presidential campaign quickens, we have a professor at GW we believe would make a relevant Style article.

Dr. William C. Adams, assistant professor of public administration, heads the Television and Politics Study Program in GW's School of Public and International Affairs. Accomplishments of this two-year program include:

- a program to award three research fellowships to study TV and politics in the summer of 1980
- a book, Television Network News: Issues in Content Research
- a National Capital Area Political Science Association conference on TV news at GW in October 1979
- a \$50,000 grant to support conferences, editing books and summer research
- subsidy of four major articles and numerous papers on television and politics by William Adams (see enclosed article on coverage of women in the TV news media)

- visiting scholar Michael Robinson conducting a study of CBS and wire service coverage of the 1980 campaign with a \$90,000 Russell Sage Foundation grant
- in the future, grants will support two additional books--one on TV coverage and foreign affairs, one on TV coverage and domestic affairs
- a conference on media coverage of the 1980 presidential campaign to be held at GW in the spring of 1981

FOR IMMEDIATE RELEASE

GW TRUSTEES SET ENERGY SURCHARGE ON TUITION, NAME NEW BOARD MEMBERS

WASHINGTON, D.C. -- Beginning in September, full-time students at George Washington University will pay an energy surcharge of \$50 a semester in addition to tuition. Part-time and graduate students and students in the 1981 summer sessions will pay \$4 a semester hour. GW's Board of Trustees had decided on the surcharge in January 1980, but waited until the May meeting to gauge current fuel prices before fixing the amount for the coming academic year.

Though the surcharge will bring in nearly \$1.3 million in additional revenues to the university, a budget deficit of \$2.4 million (\$2.1 million of which is attributable to the medical center) is still expected for the 1980-81 year.

In other action at the board's May 15 meeting, six charter trustees and two alumni trustees were named. Charter members are:

--Harold F. Baker, managing partner of the Washington law firm of Howrey and Simon. Baker specializes in anti-trust law and litigation.

--Vincent A. Burke Jr., chairman of the board and chief executive officer of Riggs National Bank. An attorney, Burke joined Riggs in 1954. He serves on the boards of the C&P Telephone Company, Garfinckels,

page two of two

PEPCO and the Federal Reserve Bank, 5th Region.

--Marvin L. Kay, secretary-treasurer of Richmarr Construction Company. A real estate developer, Kay is active in philanthropic activities in the Washington Jewish community.

--Charles T. Manatt, a partner in the Los Angeles law firm of Manatt, Phelps, Rothenberg & Tunney. Manatt is founder and chairman of First Los Angeles Bank.

Two alumni trustees whose terms had expired were named charter members: Abe Pollin, chairman of the board of Capital Centre, and Joseph S. Wright, former chairman of the board of Zenith Radio Corporation.

Two new alumni trustees were appointed: William M. Porter, deputy director of the International Energy Development Program of the U.S. Department of Energy, and Sheldon Cohen, a partner in the Washington law firm of Cohen and Uretz, and a former Internal Revenue Service commissioner.

Katharine Graham, chairman of the board of the Washington Post Company, Lewellyn A. Jennings, a consultant for Riggs National Bank, Carleton D. Smith, a former vice president of RCA Corporation, and Henry C. Clausen, 33^d, Sovereign Grand Commander of the Ancient and Accepted Scottish Rite of Freemasonry, Southern Jurisdiction, were elected honorary trustees following their years of service on the board.

FOR IMMEDIATE RELEASE

THIRD WORLD OFFICIALS STUDY MANAGEMENT TECHNIQUES AT GW

WASHINGTON, D.C. -- Nineteen senior officials from Third World government-owned or controlled organizations and agencies and private enterprises spent two-and-a-half weeks (April 14-30) at George Washington University's Center for Transnational Management Development taking part in a program designed to increase understanding of management and administrative practices world-wide. They also examined the development process in light of economic interdependence and national priorities.

Participants from Asia, Latin America, Africa and the Middle East heard presentations from GW School of Government and Business Administration faculty on topics including global inflation, international negotiations, the transfer of technology, emerging forms of international business, capital for investment, energy resource management and managing change in organizations.

The second part of the program provided participants an additional two-and-a-half week internship with American institutions similar to their own, offering the opportunity to establish close working relationships with counterpart institutions and officials in the U.S. and to work on individual administrative problems and projects. The program concluded with a graduation ceremony May 15.

FACT SHEET

UNVEILING OF THE BRONZE OF GEORGE WASHINGTON

TIME: Friday, May 16, 10 a.m.

PLACE: The George Washington University Mall at Eye Street, between 23rd and 24th Sts., NW, next to the Foggy Bottom-GWU Metro Station and just north of Ross Hall which houses GW's School of Medicine.

PLATFORM PARTY: The sculptor, Dr. Avarad T. Fairbanks
The donors, Dr. and Mrs. David N.F. Fairbanks and family
(Dr. David Fairbanks is an associate clinical professor of otolaryngology at GW and the son of Avarad Fairbanks)
GW President Lloyd H. Elliott
J. Willard Marriott Sr., Chairman of the Board, Marriott Corporation
Lenore Miller, Curator of Art, Dimock Gallery, GW
Dr. Ira R. Telford, Visiting Professor of Anatomy, Uniformed Services University of the Health Sciences

ABOUT THE BRONZE: The likeness of George Washington is a four-foot high bust in bronze weighing approximately one ton. It rests atop a six-foot granite pedestal facing 23rd Street at the eastern end of the University Mall. The bust is the only outdoor statue of George Washington on the GW campus.

ABOUT THE SCULPTOR: Avarad Fairbanks is among the most distinguished American contemporary sculptors. Born in 1897 in Provo, Utah, he studied in the Art Students League in New York and the Ecole des Beaux Arts, Paris. He holds a bachelor of fine arts degree from Yale, an M.F.A. from the University of Washington and M.A. and Ph.D. degrees in anatomy from the University of Michigan. His career as a teacher of sculpture began in 1920, when he became assistant professor of art at the University of Oregon. He subsequently taught at the University of Michigan and went on to organize the College of Fine Arts at the University of Utah in 1947. He has executed numerous statues of Abraham Lincoln, three of which are in Ford's Theater in Washington, D.C. Washingtonians are also familiar with four other examples of his work: the angel Moroni atop the Washington Temple of the Church of Jesus Christ of Latter Day Saints in the Washington suburb of Kensington, Md., and three statues at the U.S. Capitol, Northwest explorer and medical missionary Marcus Whitman representing Washington State, Wyoming suffragette Esther Hobart Morris and former North Dakota governor and U.S. Supreme Court Justice John Burke.

FACT SHEET

DEDICATION OF THE GEORGE WASHINGTON UNIVERSITY MALL AT EYE STREET

TIME: Friday, May 16, noon

PLACE: Eye Street between 23rd and 24th Sts., NW, next to the Foggy Bottom-GWU Metro Station and just north of Ross Hall which houses GW's School of Medicine.

PLATFORM PARTY: D.C. City Councilman John A. Wilson
D.C. City Councilman Jerry Moore
GW President Lloyd H. Elliott
GW Vice President and Treasurer Charles E. Diehl

INVITED GUESTS: Residents of the Foggy Bottom/West End communities
and officials of the Foggy Bottom Association
and the West End Citizens' Association
Members of Advisory Neighborhood Commission 2-A
METRO officials
Members of the GW Board of Trustees
and university administration
Contractors and architects involved in the project

COST: Approximately \$200,000. Total funding is from university sources.

ARCHITECT: VVKR Partnership, Alexandria, Va.

CON-
+STRUCTION
MANAGER: Edward M. Crough, Inc., Rockville, Md.

CONTRACTOR: Ft. Myer Construction Corporation, Arlington, Va.

PLANTING: 44 large honey locust and Bradford pear trees, evergreen shrubs.
Street furniture includes benches, chess tables, streetlighting
and a kiosk for use by the community and the university (to be installed).

MUSIC: The Audrey Maxwell String Quartet

BACKGROUND: The University Mall at Eye Street is the first street to be closed under GW's campus plan of 1970. Application to close the block was filed with the District of Columbia in February 1975. Application was approved in March 1979 (D.C. Law 2-124), and land ownership passed to the university. The District requires that, in addition to funding the construction, GW maintain the area in perpetuity.

RE: Attached text of speech by Sam Brown, director of ACTION,
to GW National Law Center graduates (400) today, Sunday,
May 18, in 1:30 p.m. ceremonies in the GW Charles E. Smith
Center

"A Real Legal Fantasy: A World that Ought to Exist" was the subject of Brown's speech to GW National Law Center graduates. Referring to the books of Bokoron, found in Kurt Vonnegut's Cat's Cradle, he described an imaginary society in which no citizen would have to pay to go to law school or to discover or defend his legal rights, a society in which "the competitive ethos" would not exist. This society would make an effort to teach all the people the law and the role or the lawyer would be expanded to that of a leader to whom people could look in other fields as well. No one would be allowed to be a lawyer for life and lawyers would be required to serve people who have been left out and left behind, those at the margin of society. (Please see page 10.) He invited the graduates to consider service with the Peace Corps or Vista and emphasized the importance of shared values.

SOCIAL STYLE AWARENESS SEMINAR AT GW

WASHINGTON, D.C. -- "Social Style Awareness" is the topic of a seminar given by Thomas C. Miller, director of recruiting and training for Financial Service Associates, to be given at George Washington University on Thursday, May 29, at noon in the lower level of Lisner Auditorium, 21st and H Streets, NW.

Social style refers to a pattern of actions which others can observe and use as a generalization for describing a person's behavior.

Sponsored by the GW Alumni Relations Office and the GW General Alumni Association, this event is part of the young alumni luncheon series. Lunch is served at noon and the seminar follows. The series is open to the public with a \$6 charge for lunch. For information and reservations, call Tim Gorin at 676-6435.

THIRTY TO GRADUATE FROM GW'S COOPERATIVE EMPLOYMENT AND TRAINING PROGRAM

WASHINGTON, D.C. -- Thirty Washington area residents who have completed George Washington University's Cooperative Employment and Training Program will receive certificates at a commencement ceremony Saturday, May 31 at 11 a.m. in the university's Marvin Center Ballroom, 800 21st Street, NW.

Eighteen persons have completed training as biomedical equipment technicians, and 12 as business machine service technicians. The commencement speaker will be Jack Mansfield, retired director of GW's Continuing Engineering Education program.

This project, funded through the DC/CETA program and administered through GW's School of Engineering and Applied Science, is designed to train the unemployed and underemployed for jobs in new and emerging occupations. The program is in its second year. A survey of Washington area hospitals, private firms and government agencies initially determined occupations with growth potential. Training for these jobs was conducted in a work-study format, with students alternating between semesters of on-campus classroom instruction at GW and of paid on-the-job training with local area employers.

GW DIMOCK GALLERY-ARCHITECTURAL CERAMICS

WHO: 16 ARTISTS OF NATIONAL AND INTERNATIONAL REPUTATION

WHAT: ARCHITECTURAL CERAMICS

WHEN: THURSDAY, JUNE 5, THROUGH FRIDAY, JULY 18
10 A.M. TO 5 P.M. MONDAY THROUGH FRIDAY

SPECIAL EVENING HOURS, JUNE 5, 7 to 10 P.M.

WHERE: DIMOCK GALLERY
THE GEORGE WASHINGTON UNIVERSITY
OFF THE LOWER LOUNGE OF LISNER AUDITORIUM
21st AND H STREETS, N.W.

WASHINGTON, D.C. -- Architectural ceramics by 16 artists of national and international reputation will be shown in an invitational exhibition in the Dimock Gallery, GW, from June 5 through July 18. The sculptural pieces in clay are done on a large scale and relate to architecture as a theme. Most of the works are made up of modular elements such as tiles and moulded bricks. Free-standing sculpture as well as wall pieces will be exhibited. Drawings and photographs will serve to amplify the artists' exhibited works.

This will be the first time that architectural ceramics have been treated as a unified theme in the Dimock Gallery. The exhibition is presented in conjunction with the Eleventh International Sculpture Conference to be held in Washington, D.C., June 4 through 7.

more

The artists represented in the exhibition will be Jill Bonovitz, Nino Caruso, Elisa D'Arrigo, Marylyn Dintenfass, David Hayes, Walter Hyleck, Jerry Janosco, Steven Kemenyffy, Larry Lubow, George Mason, Warren Muller, Turker Ozdogan, Mel Rubin, Pamela Skewes-Cox, Jim Stephenson and Farley Tobin.

Partial funding for the exhibition is provided by the National Endowment for the Arts, a federal agency, Washington, D.C.

PHILADELPHIA STUDENT IS COPY-EDITING INTERN

WASHINGTON, D.C. -- Maryann Haggerty, daughter of Mr. and Mrs. John P. Haggerty of Baltimore Avenue, Milmont Park, Pa., and a senior at George Washington University, will be a copy-editing intern at the Miami News in Miami, Fla., for a 12-week period beginning June 2, following two weeks of training in Richmond, Va.

Ms. Haggerty, who is editor of the GW student newspaper, The Hatchet, is at the Miami News under the auspices of the Newspaper Fund Editing-Internship Program. Forty students from throughout the United States are chosen each summer for the program, which is designed to bring college students into newspaper editing. A journalism major and English literature minor, Ms. Haggerty expects to receive her bachelor of arts degree from GW in 1980.

LOCAL RESIDENT RECEIVES GEORGE WASHINGTON AWARD

WASHINGTON, D.C. -- Roberta Goldberg, daughter of Mr. and Mrs. George Goldberg, 75 S. Middle Neck Rd., Great Neck, recently received a George Washington Award during commencement ceremonies of the George Washington University Columbian College of Arts and Sciences, Washington, D.C.

The GW Award recognizes students, faculty or staff who have made the university a better place through outstanding contributions. Award recipients are nominated by members of the university community and chosen by the Joint Committee of Faculty and Students.

Goldberg received the award for activities ranging from founding a student coffee house while attending the university-affiliated American College in Paris to organizing the GW Boosters Club supporting the athletics program. While clerking, recruiting, and organizing registration procedures for the School of Engineering, she also created a wall mural in the admissions office and served as official timekeeper for GW's soccer team.

Goldberg, who has a B.A. in political science, is currently working on an M.B.A. in international business at GW.

FOR IMMEDIATE RELEASE

The George Washington University and Public School Employees' Retirement System of Pennsylvania have signed an agreement for joint development of an office/retail/historical buildings restoration complex. The project, which will have an address of 2000 Pennsylvania Avenue, N.W., includes the northern half of a block fronting on Eye Street between 20th and 21st Streets, N.W. It is scheduled for completion in 1983.

GW evaluated 21 proposals before selecting the Public School Employees' Retirement System of Pennsylvania as a participant. The venture was negotiated by Walker & Dunlop working through the retirement fund's adviser, the Fidelity Bank, Philadelphia.

The complex will provide approximately 400,000 square feet of new office/retail space, 28,000 square feet in the restored buildings, and two levels of below-ground parking. The project will proceed from preliminary concepts to final design under direction of the venture.

GW DEAN TO SPEAK ON "HUMOR IN THE BIBLE"

WASHINGTON, D.C. -- "Humor in the Bible" is the subject of a free lecture on Wednesday, June 4 at 8 p.m. at George Washington University. Dr. Calvin D. Linton, Dean of GW's Columbian College of Arts and Sciences, will deliver a 50-minute lecture, followed by a question/answer period.

The First Wednesday Lecture series, of which Dr. Linton's presentation is a part, is held each month in the Kayser Room of the GW University Club, 3rd floor, Marvin Center, 800 21st St., NW. To ensure seating, those planning to attend should call the Alumni Relations Office at least two days in advance at (202) 676-6435. The public is cordially invited to attend.

UPPERVILLE RESIDENT RECEIVES HONORARY DEGREE

Edward F. Howrey, center, of Upperville, Va., poses with George Washington University Board Chairman Glen A. Wilkinson, left, and GW President Lloyd H. Elliott before the May 18 commencement exercises of the GW National Law Center when Howrey received the honorary degree of Doctor of Laws. The citation noted his innovative service as a government administrator (chairman of the Federal Trade Commission 1953 to 1955) and his formulation and molding of antitrust law and policy in both the public and private sectors. Howrey is a GW law alumnus, Juris Doctor with honors, 1927. The ceremony was held in the GW Charles E. Smith Center.
